PROFESSIONAL SUMMARY

IT professional with hands-on experience in technical support, network maintenance, and hardware and software management, ensuring system stability and performance. Proven track record in incident resolution, end-user assistance, and full-cycle ticket management. Solid grounding in networking fundamentals, Linux environments, databases, and systems security. Analytical approach to problem diagnosis and effective solution implementation under pressure. Customer-oriented with clear technical communication, a collaborative mindset, and a strong focus on IT service reliability.

EDUCATION

Bachelor of Science in Computer Engineering

Instituto Superior de Ciências e Tecnologias de Moçambique (ISCTEM) | 2021 – Present

Diploma in Computer Systems Technology

Instituto de Transportes e Comunicações (ITC) | 2017 – 2020

PROFESSIONAL EXPERIENCE

EDUPRO, LDA. | 2025 – 2026

Software Developer

- Developed modern web interfaces using Angular and React, ensuring responsiveness, usability, and efficient integration with REST APIs.
- Managed and optimised PostgreSQL databases, maintaining data integrity, performance, and security.
- Participated in requirements gathering with clients and deployed solutions on Amazon Web Services, ensuring application availability and reliability.

EvoTech – Consultoria e Serviços, LDA. | 2023 – 2024

Network Technician

- Installed, configured, and maintained network equipment (routers, switches, and access points), ensuring stable connectivity and efficient infrastructure performance.
- Diagnosed and resolved connectivity faults, focusing on rapid incident identification and continuity of services.
- Implemented security measures including network segmentation, access control, and firewall configuration.

RGB – Serviços e Investimentos Moçambique, LDA. | 2020 – 2021

Helpdesk Technician

- Responsible for diagnosing and resolving hardware and connectivity incidents, as well as providing technical support for printers and other peripherals.
- Installed and configured operating systems, including Linux environments, and corporate software, ensuring compatibility and operational efficiency.

TECHNICAL SKILLS

- Network Fundamentals: TCP/IP, DNS, DHCP, VLANs
- Network and systems troubleshooting
- Incident management and technical support (Helpdesk)
- Linux: installation, configuration, and basic administration
- Databases: MySQL, PostgreSQL
- REST APIs and testing with Insomnia and Postman
- Network security: firewalls, segmentation
- Angular, React.js, JavaScript, Python, Java Spring Boot, Node.js, TypeScript
- Docker
- Swagger / OpenAPI
- Authentication: JWT, OAuth

SOFT SKILLS

- Customer orientation
- Structured problem-solving
- Performance under pressure
- Clear technical communication
- Organisation and attention to detail

LANGUAGES

- Portuguese – Native / Fluent
- English – Upper-Intermediate (B2)
- Xichangana – Elementary (A2)

CERTIFICATIONS

- Meta – Introduction to Back-End Development
- Simplifica – Python Express
- Meta – Programming with Python
- AWS – Cloud Computing 101
- Meta – Version Control
- Alura – Front-End Immersion
